**Management Solutions for the following Industries:**

Manufacturing Wholesale Distribution Field Services Construction

**About Us**

Since 1981, our mission has been to provide high quality business management solutions that enable organizations to streamline their operations, improve productivity and reduce costs.

We are an Oklahoma owned and operated corporation that has become one of Oklahoma's largest and most respected computer system integrators and solution providers.

We offer experienced, professional consultants and technical staff that will provide you with innovative solutions for your unique challenges and growth needs. Our instructors can provide training or assist with operating procedures either on-site, in our state of the art training facility, or over the internet.

We believe in providing you with a total quality solution that will meet your organization's needs, both now and in the future. Some of these services include:

- Needs Analysis**
- Project Management**
- Data Conversion**
- Implementation**
- Training**
- Technical Support**

Every member of our organization is committed to solving your business needs, both now and in the future!

**Industries**

**Manufacturing**

To realize their full potential, manufacturing companies must have access to timely and accurate cost analysis information, as well as the ability to plan and schedule. Whether you are a light manufacturer, an assembly manufacturer, or made-to-order manufacturer, we have the experience to help you get real-time information to make better business decisions.

**Wholesale Distribution**

Accurate inventory control and the ability to provide exceptional customer service is what wholesale distributors need. Sophisticated pricing structures and detailed sales history for each customer, product and product line give you complete insight into your customer purchase patterns. We have helped many companies cut costs, manage inventory more effectively and improve customer service, even across multiple locations.

**Field Services**

The service industry has a unique set of needs. In order to be successful, service companies need to have a customer management system that integrates with their back office accounting system. This includes dispatching, tracking of service agreements.

**Construction**

For general contractors, subcontractors, architects, and engineers keeping a close eye on job profitability is the key to success. Having the ability to track cost and revenue information down to fine detail for every job (project) is essential. Project estimating, billing, and time materials invoicing help to streamline the entire job process.

## Services

### Needs Analysis

Our system recommendation process begins by taking the time to understand your company's needs and objectives, both short-term and long-term. Our professional consultants have more than 20 years experience with technology and business management solutions and they have assisted hundreds of businesses select the right solution for their organizations needs.

### Project Management

Every project is assigned a project manager to oversee and manage the resources that will be needed to successfully implement your solution. Having one point of contact insures consistent communication and overall project success.

### Data Conversion

With the latest data migration tools available, we can save you a lot of time and effort by converting important information from your old system to your new one.

### Implementation

Once a new system has been selected, we follow a detailed implementation methodology to insure your success. Our certified consultants will be by your side during the implementation process to help you set up your system.

### Training

For long-term success and satisfaction with your system, thorough training is necessary. All training is done by Certified Trainers via a variety of methods.

### Technical Support

We understands that once your system is up and running, you may have the need for technical or application support. There are a variety of support options including our own help desk.

## Business Management Solutions

### MAS 90 / MAS 200

Recommended by more CPAs than any other business management application in its class, Sage MAS 90 ERP offers a broad selection of feature-rich solutions, including accounting, financial reporting, distribution, manufacturing and e-business management. Sage MAS 200 ERP offers all the functionality of Sage MAS 90 ERP, but incorporates all the benefits of a client/server platform, including more efficiently distributed processing, high performance, enhanced data integrity and reliability, remote access support, and scalability.

### JOBOPS Manufacturing

Provides a comprehensive solution for automating job management functions for manufacturing, distribution, and field service organizations. JobOps works in conjunction with Sage MAS 90 and Sage MAS 200, providing small to mid-market companies with a robust solution to handle their operations and workflow around making a product and servicing it.

### Business Works Accounting

Sage BusinessWorks Accounting bridges the gap between off-the-shelf, entry-level products and complex high-end systems. Its modular design is ideally suited for growing small and mid-sized businesses that require more muscle than basic bookkeeping software can provide.

### Peachtree Software

Peachtree by Sage has been recognized in the accounting software market for providing small business owners, who understand the importance of accounting in managing their business and their employees, with the insight essential to make better business decisions. Designed for small business owners to better manage their accounting and streamline their operations, the Peachtree line includes a solution for virtually every need and budget - from basic to advanced
